Door Collection 2018

www.jbkind.com

Welcome to our 2018 Collection

Our 2018 Door Collection showcases the diversity of our designs, finishes and styles. From firm favourites to innovative new doors, our trademark professional advice helps ensure your door purchase is supported every step of the way. Plus, many of our 200+ door designs are exclusive to JB Kind, so you won't find them anywhere else.

Our incredibly popular Laminates range has expanded (pages 54-59), thanks to its versatility, durability, consistency of finish and value for money. The new laminate doors include cottage style oak and grey timber effect finishes, as well as an American inspired Alabama design that is available in two on-trend colours. There is also our new Pintado painted grey door, a minimalist, grey flush design (page 60). Of course, we've still included all our most popular ranges and the outstanding External Extreme door range (pages 92-95).

Look out for our useful 'At a Glance' guides, which help make it easier to locate those products that have bespoke options, can be rebated into door pairs and our comprehensive fire door service. You'll also find information on space saving pocket door systems and internal doorsets.

Whatever your budget or design dream, we'll have the doors to suit your style.

Architects, Specifiers and Designers

Our dynamic door designs offer undeniable value as well as compliance with a wide range of UK and European industry standards. From fire protection and thermal insulation to renewable resources and disabled access, you can rely on JB Kind to provide the quality standards you need. We have recognised third party accreditation from schemes such as BWF-CERTIFIRE and FSC® chain of custody.

If you have any questions or need some expert advice, don't hesitate to call us on 01283 554197.

Our dedication to meeting the highest standards for our customers is illustrated by our continuous achievement of the UK quality award ISO9001. Certificate number: Q 09320

Helping you choose and buy your doors

STEP 1

Choose your preferred door style

Browse through and select your favourite door designs, colours and finishes. Not forgetting, a matching glazed partner, should you wish to add some extra light. Take inspiration from our Gallery of lifestyle images online at jbkind.com

STEP 2

Check the sizes available

If one of our standard door sizes does not fit your requirements, check if a special size can be ordered through our **Bs** Bespoke Options service, pages 10-11.

STEP 3

Consider how the doors will be fitted

- Do you need any door pairs? If so, take a look at our Door Pair rebating service p13.
- Would a Pocket Door System help create some extra space? Ideal for renovation and new build projects, see pages 6-9.
- Will you require any fire doors? Virtually all of our door designs offer an FD30 fire door option. See p98.
- A pre-hung Doorset complete with frame and ironmongery could be better suited to your project. If so, see pages 12-13.
- Ensuites, wardrobes and cupboards often require a space saving solution. Consider a matching bi-fold option, pocket door system or invest in some sliding door tracking.

STEP 4

Pick the right handle

A stylish handle really does finish off a door. Take a look at our Door Handle Packs, pages 90-91, supplied with everything you need to fit a door.

STEP 5

Price up your doors

JB Kind's doors can be purchased through Builders Merchants and Door Retailer partners across the UK, any of which will be happy to provide a quote.

Either call us on **01283 554197** for details of your local supplier or visit our online Supplier Locator at jbkind.com.

Alternatively you can Buy Online via one of our approved Online Partners and your doors will just be a click away.

Product key features

To help make your door decisions easier, the key features of each product have been included adjacent to the individual door image. Please refer to this handy set of icons as you browse through the brochure.

Bespoke Options available, see pages 10-11

FD30 fire doors available from stock

Solid core construction

Semi-solid core construction

Standard core construction

For definitions of the most commonly used door terminology, see our Glossary of Terms online at jbkind.com

Door finishes

Our doors are available in the following finishes:

Wood veneer

Laminate

Painted

White primed

Door styles

To help select your favourite door designs our collection has been arranged in the following styles:

Contemporary

Classic

Shaker

Cottage

Measuring up

To make sure you purchase the right door sizes, take the following measurements.

Door width: measure the top, middle and bottom of the door frame. The widest measurement determines the width of the door.

Door height: measure inside the vertical side of the frame. The longest length determines the height required. Remember to make allowance for any floor covering.

NB. You can plane door edges slightly to reduce the size. If required, please call us for details of the lipping size.

Door size conversion chart

A little help if you need to work out the metric and imperial equivalent for door sizes.

HEIGHT & WIDTH		
Metric (mm)	Imperial (inches)	Imperial (feet & inches)
1981 x 457	78" x 18"	6'6" x 1'6"
1981 x 533	78" x 21"	6'6" x 1'9"
1981 x 610	78" x 24"	6'6" x 2'0"
1981 x 686	78" x 27"	6'6" x 2'3"
1981 x 711	78" x 28"	6'6" x 2'4"
1981 x 762	78" x 30"	6'6" x 2'6"
1981 x 838	78" x 33"	6'6" x 2'9"
1981 x 915	78" x 36"	6'6" x 3'0"
1981 x 1067	78" x 42"	6'6" x 3'6"
1981 x 1168	78" x 46"	6'6" x 3'10"
1981 x 1220	78" x 48"	6'6" x 4'0"
1981 x 1372	78" x 54"	6'6" x 4'6"
1981 x 1524	78" x 60"	6'6" x 5'0"
2032 x 813	80" x 32"	6'8" x 2'8"

2040 x 926	80 1/4" x 36 7/16"	6'8 1/4" x 3'0 7/16"

Pocket Door Systems

A pocket door system that enables doors to slide conveniently into a wall cavity and save space whilst looking incredibly stylish.

Easy to install* with a rigid frame, our pocket door systems are supplied pre-assembled so that they can be fitted in half the time of other brands.

Available for both single and double door situations in a selection of sizes, almost all of JB Kind's internal doors are suitable for use as a pocket door. You can also choose from a selection of pocket door accessories too!

Key features:

- Easy to install* rigid frame, supplied pre-assembled
- Fitted in half the time of other brands
- Designed for stud and plasterboard
- Door is fitted after all installation and decoration has been completed, avoiding any potential damage to your door.
- Door choice can be changed in the future without structural alteration to the wall.
- Compatible sliding door hardware available
- Available in single and double format

*We always recommend using a professional fitter.

Product info:

- The cassette structure is made from 0.5mm galvanised steel
- The cassette sides are formed from single pieces of pressed steel which is corrugated for complete stability
- Transverse ribs fixed to the corrugations further re-inforce the structure and allow fixing of plasterboard direct to the cassette
- Twin spacer bars are supplied that are fixed between the cassette and jamb during installation to ensure the structure remains square
- The internal pocket cavity is protected by a cover during installation
- Suits door thickness 35mm
- Maximum door weight 80Kg

How to order your Pocket Door System: Your step by step guide

Mistral Walnut

STEP ONE

Single or Double Pocket Door System

Use our size guide tables to check your requirements. For a double pocket door, you will need to purchase two single pocket door systems and a double leaf conversion kit.

STEP TWO

Choose your door design

The majority of our door designs are suitable for use as pocket doors. However, some doors that have raised mouldings and 44mm fire doors are not suitable. Please get in touch if you're in any doubt.

STEP THREE

Timber accessory kits

You will need an accessory kit as the pocket door system cannot be installed without one. Choose from either white primed or varnished oak, available for both single and double options.

STEP FOUR

Door Grooving

The bottom edge of the door will need to be grooved to fit in the floor guide of a pocket system. If required, our in-house joinery workshop can pre-groove your doors prior to delivery.

STEP FIVE:

Optional accessories

Automatic Door Closer: is a self-closing system that enables the door to glide into place automatically after being opened.

Double simultaneous operator: enables a double pocket door to open and close simultaneously.

Soft-close damper unit: applies a brake making sure that the door moves slowly and smoothly to a close.

STEP SIX:

Door furniture

Choose from either a bathroom privacy lock or flush door pull.

STEP SEVEN:

Finding a JB Kind door supplier

Take a look at the Supplier Locator on our website or approved Online Partners. Once you've chosen a place to purchase from, then just hand over all of your requirements and your doors and pocket systems should be with you in no time!

If you do have any questions, our expert JB Kind team is on hand to help you out, just call 01283 554197 or email info@jbkind.com

Timber Accessory Kits

Available in either white primed or varnished oak, Accessory Kits are required to complete pocket door installation.

Single pocket door kit (shown in oak)
Includes: 2 x cover moulds with brush seals, header cover and jamb with seals

Double pocket door kit (shown as white primed)
Includes: 4 x cover moulds with brush seals and 2 x header covers

	Code
White primed – single pocket door kit	SGLWPRIAC

Bs Bespoke options

Whether you're self-building, renovating your home, purchasing for a development project or you're an interior design expert, you'll want to take a look at JB Kind's bespoke options. The versatility of our bespoke service is ideal for those special requirements.

Make your mark

Perhaps you love one of the designs from our Door Collection but would prefer it in a different timber veneer or painted finish, or perhaps you would like to create a style that is completely unique and different? More veneers and painted finishes can be viewed online at www.jbkind.com.

For more information on the bespoke options available, visit www.jbkind.com or talk to us, we are here to help.

Take a look below to see which of our door ranges have bespoke options available.

Look out for the **Bs** logo adjacent to product images.

AT A GLANCE GUIDE TO BESPOKE OPTIONS

Door Range	Bespoke Options
Oak Contemporary	All door designs (excl. Bi-folds)

MADE TO MEASURE

There are a wide range of standard door sizes available, however, sometimes you just cannot avoid an awkwardly sized door opening. Many of the doors from our collection can be produced to order as a special size and of course any door designs that are created just for you.

BESPOKE GLAZING

Whether you prefer a full glazed panel or smaller apertures, there are so many options for a glazed door. Clear, bevelled, diamond cut and etched are some of the most popular glazing types. Let us know what you would like to achieve and we'll advise on the options.

FIRE DOORS

JB Kind can supply bespoke fire doors, in a wide range of solid and glazed options. Supported by the appropriate accreditations, you can be safe and stylish.

Internal Doorsets

Easy onsite door installation that gives a perfect fit every time

Rebated door pairs

Door pairs, or double doors as they are often known, really do add a touch of style and class to a home.

If you would like to fit a first-class door pair, we would recommend considering Rebated Meeting Stiles. Rebating means removing a section along the vertical edge of each door where they meet to allow them to fit snugly together, eliminating the small gap that you would see with square meeting stiles (two doors fitted side by side).

A number of door designs held within our stock ranges are suitable for rebating with a short lead time (see table below).

This service is offered through our in-house joinery workshop. If your preferred door type is not listed, please check if our Bespoke Options service is available, as they could be made to order.

All of our internal doors, including fire doors, can be supplied as factory pre-assembled Doorsets. The perfect door solution for self builds, new housing and apartment developments.

What's in a Doorset?

- 1 Hinges fitted
 - 2 Door leaf
 - 3 Latch/lock fitted
 - 4 Frame/lining, complete with door stop
 - 5 Floor covering clearance
 - 6 Removable transport bracket
- Architrave is also supplied (not shown): available in a variety of styles

Note: Doorset pairs are supplied unassembled.

Your Doorset enquiries

Each Doorset enquiry is unique and specification accuracy is essential. Please get in touch with our Sales team on 01283 554197 to discuss your requirements and we will send you a Doorset enquiry form.

Here's a checklist of the key information that will be required to help us process your enquiry:

- ✓ Quantity required
- ✓ Structural opening heights and widths
- ✓ Wall depth
- ✓ Handing (left or right) as viewed from the pull side
- ✓ Floor clearance (distance from bottom of frame to bottom of door)
- ✓ Type of door – Standard (35/40mm), FD30/FD60 fire rated (44/54mm) or Security rated
- ✓ Door design style
- ✓ Frame material and finish – mdf or softwood in primed, lacquered or stained
- ✓ Frame type – rebated or lining
- ✓ Architrave profile and dimensions

Door Handle Latch Packs

the perfect partner for your JB Kind doors

Enjoy the convenience of a stylish door handle latch pack, supplied with everything that you need to fit your door in one box.

Each pack comes with a pair of handles, a smartlatch, a choice of keeps and three quality stainless steel ball bearing hinges.

SMARTLATCH

The Smartlatch is an innovative latch that can be quickly installed in less than 5 minutes, saving tradesmen up to 25 minutes per door.

Smartlatch: Fit in under five minutes

Step one: Using a 25mm drill bit, bore out to 75mm in depth.

Step two: Using the same bit, drill the hole for the spindle.

Step three: Then simply insert the latch.

Privacy latch packs with revolutionary push button, available in all handle styles. No requirement to purchase or fit a separate bathroom lock.

With a 10 year parts and mechanism guarantee, the premium stainless steel and zinc diecast construction provides that all important peace of mind.

Please note: the hinges provided in our latch packs are not suitable for use with fire doors. Fire door hinges are available separately, call 01283 554197 for details.

Tigris Extreme, shown painted

Our External Extreme door range has revolutionised the replacement front door market! Constructed with an exceptionally durable and dimensionally stable top layer of MEDITE[®]TRICOYA[®]EXTREME and sealed with a factory applied paint finish, ensuring that the doors can withstand all weathers – and to illustrate just how confident we are, we issue every External Extreme door with a 10 year guarantee!

External Extreme doors are perfect for painting your own chosen colour and all glazed doors are fitted with Pilkington[™] double glazed units. Easily fitted by a competent joiner into an existing or new wooden door frame, homeowners will have confidence that External Extreme will be a long lasting, reliable exterior door option.

Traditionally used for cladding and facias, MEDITE[®]TRICOYA[®]EXTREME's hard-wearing and weather resistant properties make it perfect for use within the structure of external doors.

DURABLE
Longer lasting, perfect for external use.

PERFECT FOR COATING
Improved stability and durability enhances service life of the coating. Damaged coating will not affect the core.

SUSTAINABLY SOURCED
FSC[®] Certified. Wood used from sustainable sources.

ENHANCED STABILITY
Swelling and shrinking dramatically reduced.

LOWER MAINTENANCE COSTS
Extended periods between exterior coatings maintenance.

RESISTANT TO FUNGAL DECAY
Effective barrier to fungal decay.

Contents per box: sufficient for one side of a door
2 jambs 1 head
2 corner blocks 2 plinth blocks

For a perfect finish...

Applying a quality finish to your internal doors ensures their long term appearance and performance.

We recommend the following finishing products that have been tested on our unfinished oak internal doors with excellent results.

All-in-one natural hard wax oil that dries to a natural, clear matt finish.

Please refer to www.mannsuk.com for more information and to purchase these products directly.

Clear, water based varnish that is available in 4 sheen levels.

The principal enemy of timber doors is excess exposure to moisture or dryness. Having left our custody, we have no control over the conditions to which they are subjected and to avoid any subsequent cause for disappointment, we strongly advise the following advice is heeded. If suitable care and treatment is not taken to prevent the free passage of moisture either into or out of the wooden door, stresses within timber may be released resulting in movement or distortions such as swelling, shrinking, warping, splitting, twisting or even discolouration. We are unable to accept any liability for any failings where they have arisen due to the free passage of moisture.

Storage

Upon receipt, check your doors carefully for condition and suitability, as claims made later may not be considered. Please store doors laid flat, fully supported off the floor with at least three full width bearers of the same dimension in a dry fully ventilated area, with protective packaging intact. Doors supplied unfinished should be thoroughly sealed on all faces and edges prior to the commencement of any joinery work, although first sizing them may be to advantage. We recommend that veneered doors are sealed using Manns Extra Tough Interior Varnish or Manns Door Oil.

Wood finishes

There are numerous brands on the market and we fear many are formulated to achieve a low market price rather than quality. We have tested Manns Extra Tough Interior Varnish and Manns Door Oil which have produced excellent results. For this reason we strongly recommend the use of one of these two finishes to help protect the guarantee. Either of these two finishes will provide a lasting seal between component parts. Good quality solvent or acrylic finishes may be used, but check they are suitable for use with timber laminates or veneers. Follow the treatment manufacturer's instructions carefully and avoid over applying the treatment, particularly the first coat.

We recommend keeping a copy of the claims made for the product in the event it fails to perform. It is vital all finishing systems are applied equally to both sides and edges at the same time. Rapid changes in ambient moisture are extremely detrimental especially when unbalanced.

Natural oils such as Danish oil, tung oil and linseed oil are not suitable for use with any of our products. These solutions are penetrating oils and are not suitable for use with veneered doors. The application of a base coat stain or paint primer alone is not deemed to form a seal. Failures related to treatment will be assessed based on their application and the claims made by their manufacturer.

Installation

Check the door for suitability prior to commencing work. Claims made later may not be considered. When trimming doors, reduce them equally and not excessively from the top and bottom for height, to the hanging edge only for the width, if minimal, but equally with the meeting edge if a greater amount is necessary.

Recesses for hinges (3 No. 75mm internal, 3 No. 100mm external) and mortises for latch / locks etc. should be cut to the minimum recommended sizes. Panel door mortises should not be located at rail joints as this may significantly weaken them. On completion remove doors, taking off all ironmongery and treat every cut / untreated surface liberally with a number of coats of an appropriate treatment before finally refitting. Remember to pay particular attention to all edges of your door, particularly any exposed end grain where the propensity for the free passage of moisture is much greater.

Installation - Fire doors

When fitting our FD30 fire doors, please note that there are strict limitations about how much they can be trimmed and these must not be exceeded. Ironmongery used in the installation of fire doors must be strictly in accordance with the door's certification and appropriate for use with a fire door.

Internal door specific

We strongly advise against the installation of all types of timber doors into a building with recent plastered or screeded areas. Wet sites with enclosed unheated buildings represent extremely detrimental environments and must be thoroughly dry, without condensation, before doors are introduced. Even our pre-finished doors should not be exposed to inappropriate damp site conditions.

External door specific

Even in times past, it was never advisable or intended that timber entrance doors be fully exposed to the worst elements of our climate, even if well coated. A South / South Westerly elevation is the worst direction for the prevailing weather and exposure to the hottest sun which can seriously degrade external doors.

We recommend they are set back from the front face of the building or covered by a canopy or porch way projecting not less than about 1.5m, regardless of elevation. Always fit with a suitable weatherboard regardless of frame cill type fitted, to prevent droplets of moisture hanging from the door bottom.

Future maintenance is most important to retain good appearance over many years and we recommend washing down with warm water and detergent every two to three years and re-coating.

Quality standards

All external and internal doors are supplied in accordance with BS EN 942:2007 "Timber in Joinery General Classification of Timber Quality", BS 5278:1976/EN25:1975 "Doors measurement of Dimensions and of Defects of Squareness of Door Leaves" and BS EN 951:1999 "Door leaves. Method for measurement of height, width, thickness and squareness".

Any claims against warranty relating to manufacture will be assessed strictly in accordance with the criteria contained within.

Any claims against warranty relating to storage, handling or installation of any of our doors will be assessed against guidelines contained within BS8000 part 5:1990 and British Standard Code of Practice CP151. JB Kind Terms and Conditions of Trading apply.

Safety Glass

To comply with building regulations all our pre-glazed doors meet the requirements of the European standards.

IMPORTANT

Wood is a natural material and variations in colour and graining should be expected. Note: With door pairs we cannot guarantee an exact veneer match.

Colours depicted are representative only and are reproduced as accurately as the printing process will allow.

We reserve the right to make alterations or modify specifications without notice. Errors and omissions excepted.

Look for FSC® certified products

FSC®
Certified

supplier

The mark of
responsible forestry

We hold our own FSC® chain of custody certification for certain doors within our collection. Chain of custody certification ensures that the systems within our business allow us to track the door from the day we buy it, through to the day we deliver it. Wherever you see FSC® Certified within a product description that door has been produced from certified materials and other controlled sources.

Fire Door Information

Fire doors are a serious business, and that's why we invest our time, energy and money to ensure that we have one of the most comprehensive, and accredited, collections of fire doors in the UK.

Certificated Fire Doors

Many of the fire doors in this catalogue are certified within the BWF-CERTIFIRE scheme and the products where this applies are endorsed with the logo. BWF-CERTIFIRE certification validates these products suitable for use as fire doors and provides the means to independently authenticate the quality and performance of the doors to which this applies.

For more information on the BWF-CERTIFIRE scheme, visit jbkind.com

As responsible suppliers of fire resistant doors, we ensure that all of our FD30 doors have been tested in accordance with either the British BS476 pt22 or European EN1634-1:2000 standards.

All of our fire doors have a Fire Test Assessment report which is available upon request and outlines in detail exactly what you can and can't do when fitting any particular door. All fire doors are glazed with fire-rated glass.

FD30 fire door pairs: please note that not all FD30 fire doors offered within this brochure are certificated for use as pairs. Please contact us for more information.

For more information on fire doors, including details on Glazed Fire Doors & Part M (Mobility) visibility requirements, log on to jbkind.com or call 01283 554197.

Our doors can be ordered from Builders Merchants and Door Retailer partners across the UK and buying your JB Kind doors is now even easier with our online **Supplier Locator**. Just go to www.jbkind.com and put in your postcode to find the closest retailer to you – we also tell you which outlets have JB Kind door displays so you can take the time to go and experience just how fabulous our doors really are!

If you already know exactly what you want and you like the ease of ordering online, then just pop onto the website and check out the buy online section with links to our approved **Online Partners** - then you're just a click away from receiving your dream doors.

Sometimes you'll need advice and we are always here to help. Just give us a call on 01283 554 197 or email info@jbkind.com
